### BOOTCAMP

Feb. - Aug. 2022

*University of Adelaide*

Development of real-life applications using HTML5, CSS3, JavaScript, jQuery, Bootstrap, Express.js, React.js, Node.js, Database Theory, MongoDB, MySQL, Command Line, Git.

### SOUNDSCAPE

*Project*

Music platform including file upload, authentication and internationalisation using modern CSS libraries, Vue.js and MongoDB.

### REACT PORTFOLIO

*Project*

Development of a personal portfolio to showcase my projects and hone my React skills.

## About me

A motivated and enthusiastic software engineering graduate with a background in web-based development projects looking to launch a career in Fullstack Development. Possessing a sound understanding of current coding tools, frameworks and platforms, including HTML/CSS, JavaScript, and React. Good communicator with excellent problem-solving skills and the ability to quickly learn new technologies. Seeking further experience within this field in an entry-level role where I can utilize my technical skills and develop knowledge through continuous learning.
